

TAKE CONTROL of the College Application Process!

Designed for rising 12th graders to get a head start on the college application process!

The fall can be a busy and overwhelming time for high school seniors. There's school work (that matters!), SAT/ACT exams, and the college application process. Reduce stress by getting the college application process started and under control this summer, while also strengthening important skills for college: planning, organizing, task initiation and time management.

Working with one of our expert instructors, students will:

- Get a jump on the process to make the fall significantly less stressful!
- Get started (and finish!) essays/personal statements
- Create a timeline and calendar of important dates and a plan to get it all done!
- Develop a spreadsheet to help track key data of each college to easily compare and contrast offerings and areas of expertise
- And more!

Tools for Learning. Skills for Life.
